THURSDAY, JANUARY 20

The South has approximately 240,-
000,000 acres of undeveloped land.Little Montenegro has rejected
Austria's peace terms and King
Nicholas has sought refuge in Italy.Mrs. Syd Knight, of Fayetteville,
Tenn., had her husband arrested for
treating her cruelly, but when the
sheriff shot him she took it all back
and said she never was happier in
her life.President Wilson's plans for going
before the country on the national
defense issue took definite shape
Thursday and the work of mapping
out the itinerary of his first speak-
ing trip was almost completed. It
also was decided that if public busi-
ness permits, other tours will be
made in as quick succession as pos-
sible. A revised outline of the first
trip drafted Friday calls for visits
to eight or nine middle western
cities, including Cincinnati, Cleveland
and Toledo, Chicago and Des Moines.
The president probably will start
west immediately after his visit to
New York January 27 to deliver ad-
dresses before the Railroad Business
Association and the motion picture
board of trade. He probably will
remain away from Washington about
a week.Considerable opposition has de-
veloped to the drastic anti-pass bill
being backed by the administration,
and there is a lot of criticism being
indulged in concerning what is
characterized as the undue haste in
pushing the measure through with-
out a hearing of those interested in
its provisions. In this connection it
is pointed out that although the
most sweeping over presented in the
Legislature, it was jammed through
the Senate committee to which it
was referred after a notice of only
six hours. Protests against the
passage of the measure are begin-
ning to come from the newspaper
publishers of the State, who appear
to be especially aimed at in the bill,
which prohibits newspaper publish-
ers and carriers exchanging
advertising and transportation on a
contract basis. The Kentucky Press
Association at its recent midwinter
meeting in Lexington went on re-
cord against any measure that would
affect their dealings with the rail-
roads on a contract basis, and a
Legislative Committee was appoint-
ed to look after their interests.

Abolishing Offices.

Frankfort, Ky., Jan. 19.—Among
the bills introduced in the house was
one abolishing the position of inspec-
tor of revenue agents, now held by
John E. Byars, of Hopkinsville. Bills
also were introduced to abolish hotel
inspectors.

Divorce Suit.

Mayfield, Ky., Jan. 19.—A suit for
divorce has been filed in Circuit Court
by Mrs. Maude Sullivan against W.
D. Sullivan. They have been married
since 1901 and the action for di-
vorce caused a surprise. The defend-
ant is a number of years older than
the plaintiff and was at one time one
of the most prominent and wealthy
planters of the county. Mrs. Sullivan
also sues for \$1,000 alimony.

Carranza's Responsibility.

On the confirmation of the story
that Carranza had given the head of
the American party massacred in
Mexico safe conduct depends wheth-
er the United States will demand indem-
nity as well as punishment of the
bandits.DAIRY
FACTS

YELLOW CREAM AND BUTTER

Experiments Show Popular Belief
That Color Indicates Richness
in Quality Mistaken.The belief that a bright yellow color
in milk means richness in quality is
not true. Experiments conducted at
the college of agriculture of the Uni-
versity of Missouri show that the
change from the white cream and but-
ter in winter to yellow cream and but-
ter in spring and summer does not in-
dicate an increased fat percentage.
The very highest colored milk that a
cow can give may have the lowest fat
percentage. Such a condition is found
in the so-called colostrum milk, the
first milk that a cow gives after giv-
ing birth to a calf.The explanation of the wide differ-
ence between the results of the ex-
periments and the popular belief in
regard to the relation of color to rich-
ness lies in the cause of the natural
yellow color of cream and butter. It
was found that cows were not able to
produce the yellow coloring matter for
their cream and butter. The coloring
matter must be derived from the feed.
The yellow coloring matter of milk
was found to be identical with a yel-
low coloring matter that is widely dis-
tributed in plants and fresh grass.
This coloring matter is called carotin.
It takes its name from the carrot,
where it is very abundant, and where
it was first discovered by scientists
more than one hundred years ago.The difference in the color of cream
and butter in winter and spring was
found to be due to the fact that the
winter feeds contain little or no carotin.
No marked increase in the fat
percentage accompanies the increase
in color when foods rich in carotin are
fed. It has been shown that the aver-
age cow gives a higher per cent of
fat in its milk during the winter than
in the spring and summer.

BUTTERMILK GOOD FOR CALF

Feeding Value Is Practically Same as
That of Skim Milk—Some Danger
of Tuberculosis.Calves can be successfully raised
with buttermilk instead of skim milk,
says one farmer. The feeding value
of buttermilk is practically the same
as that of skim milk. There is some
risk of contracting contagious diseases
such as tuberculosis in feeding fac-
tory buttermilk, unless the buttermilk
is from pasteurized cream. For this
reason skim milk is more desirable.
Buttermilk should always be fed as
fresh as possible so that the degree of
acidity is the same.Buttermilk may be substituted for
skim milk when the calf is three
weeks old. The substitution should
occupy a period of a week or ten
days, so that the calf is at least a
month old by the time the diet con-
sists wholly of buttermilk.Other feeds should be used with
buttermilk just the same as with
skim milk. Equal parts of ground corn
and either oats or bran with alfalfa
or clover hay has given the best re-
sults. Calves will usually begin to
nibble a little clover hay when two
weeks old. They may be taught to
eat grain at the same time by placing
a little in the bottom of the milk
bucket after feeding.

MILK MACHINE WORKS QUICK

Task of Milking Cow May Be Accom-
plished Rapidly and Economically
—No Danger of Injury.The Scientific American illustrates
and describes a milking machine, in-

Milking Machine.

vented by A. Truchot of Chateau,
Mont., as follows:By means of this device the milking
of a cow may be accomplished rap-
idly and economically and with no
danger of injuring the animal. The
apparatus is of light weight, and is
adjustable so as to permit the move-
ment of the animal during the milking
operation. The milking operation
closely simulates that of manual op-
eration.

Cost of Keeping Cow.

The annual cost of keeping a cow is
close to \$65, if a man values his
labor at 15 cents an hour. It takes a
good milker to pay her way, one that
produces anyway 5,000 pounds of milk
a year separating out 200 pounds of
butterfat.

Ventilation Is Essential.

Ventilation is absolutely essential
for the health of the cows, but is one
of the hardest problems to solve in
most barns.

A Strange Story.

Argyle, Mich.—Mrs. Wm. H. Car-
son, in a letter from Argyle, says:
"I was almost wild with pain in my
head, and other severe pains, due to
womanly troubles. Cardui gave me
great relief at once. Further use of
Cardui raised me from my bed of
agony. Cardui saved my life, and I
can't be thankful enough for what
it did for me." Whether seriously
sick, or simply ailing, take Cardui,
the woman's tonic. As a general
tonic for women, to improve the ap-
petite and build up the constitution,
Cardui is in a class by itself. Those
who have used it say it does the
work; it relieves, it cures. Try it.
